Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/594,046	Applicant(s) EKWURIBE ET AL.	
	Examiner Phyllis G. Spivack	Art Unit 1614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 August 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Applicants' Response filed August 17, 2010 is acknowledged. Applicants previously elected the non-azo bonded 5-ASA compound, i.e., 5-amino salicylic acid, as the first therapeutic agent, and the 4-APAA compound azo bonded to a 5-ASA compound that is known as APAZA, as the second therapeutic agent. The election has been treated as an election without traverse (MPEP § 818.03(a)).

Accordingly, the subject matter under consideration remains those pharmaceutical compositions comprising the combination of 5-ASA and APAZA and methods of treating an inflammatory colon condition, claims 1-9, 15, 30, 33 and 39. Those pharmaceutical compositions and methods of treatment drawn to the administration of other, non-elected therapeutic agents, and claims 34-38 and 40, are presently withdrawn from consideration by the Examiner, 37 CFR 1.142(b), as drawn to non-elected inventions.

The rejections set forth in the previous Office Action are withdrawn. The following objection and rejection constitute the only objection and rejection presently applied to the instant claims.

A Terminal Disclaimer filed August 17, 2010 is further acknowledged and has been accepted.

The abstract of the disclosure is objected to because it is not drawn to the subject matter under consideration. The subject matter under consideration includes the compound APAZA and excludes methods of treating the stomach. Correction is required. See MPEP § 608.01(b).

Art Unit: 1614

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-9, 15, 30, 33 and 39 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 7,151,095. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patent are drawn to methods of treating inflammatory conditions of the gastrointestinal tract comprising administering a pharmaceutical composition comprising a compound of Formula II. A compound of Formula II is the elected compound, i.e., 5-aminosalicylic acid, when R⁹-R¹² are all hydrogen. The sodium salt of APAZA (5-(4-carboxymethylphenylazo)-2-hydroxy-benzoic acid is disclosed in claim 15.

No claim is allowed.
